„Top PV Wholesale Supplier 2019“: BayWa r.e. receives prestigious award for businesses in six countries

Munich, 5 February 2019: BayWa r.e., global renewable energy developer, service provider and wholesaler, has received the title Top PV Wholesale Supplier for its business activities in the German, Italian, Belgian, Dutch, Swiss and Australian markets. Due to its outstanding performance in the European market, the company has also been awarded Top PV Wholesale Supplier Europe for the second time in its history. The winners of the award are selected on the basis of a survey among installers conducted by the market and opinion research institute EuPD Research.

“Winning these awards again is the result of our close and successful cooperation with installers and demonstrates that we are perceived as a quality supplier throughout Europe and beyond”, says Frank Jessel, Director of Business Entity Solar Trade at BayWa r.e. “The growing number of awards is a great acknowledgment of our strategy and shows that our worldwide commitment to offering a comprehensive portfolio of products and high-quality services pays off in the long term. This is a brilliant starting point to expand our global activities in 2019 and develop our customer-oriented approach further.”

The results of the EuPD Research survey, which is published annually in the PV InstallerMonitor, attest not only to BayWa r.e.'s outstanding position in the module distribution market but also to the ability to achieve above-average customer satisfaction. This is also true for the Australian market, where the local BayWa team, present at seven locations throughout the country, received the Top PV Wholesale Supplier Award for the first time in 2019.

The seal has been awarded annually since 2010 in the categories modules, inverters, storage technology and wholesale based on a worldwide satisfaction survey amongst PV installers and end customers. In addition to the portfolio range and quantity, EuPD Research also examined aspects such as the customer retention rate. The TOP PV Wholesale Supplier award therefore is an independent quality attribute for companies that can boast a particularly high customer satisfaction score.

BayWa r.e. renewable energy GmbH (BayWa r.e.):

Across solar and wind, at BayWa r.e we rethink energy - how it is produced, stored and used the best.

We are a leading global developer, service supplier, wholesaler and provider in energy solutions.

We deliver renewable energy solutions worldwide; have brought 2 GW of energy online – while managing 5.5 GW of assets.

BayWa r.e is a leading supplier to the solar wholesale market. We also have a rapidly growing energy trading business.

As an integral part of the €16 billion BayWa Group, we work hard every day to find new solutions, push technological boundaries and actively shape the future of energy.
